

The Piggy Bank Puzzle

Bill's piggy bank held coins six
The same was true of brother Dick's
The largest piece was half a dollar
The eleven others all were smaller
And when they added up their tills
Dick's sum was two cents more than Bill's
Now each of them spent coins three
And they must have withdrawn equally
For when they once again took score
Dick's sum remained just two cents more
Now please account for every cent
How much they saved - how much they spent
